Chemical Properties

CAS	
Formula	C ₂₀ H ₃₄ O ₈
MW	402.48
Storage	
Structure	 <p>The chemical structure shows a central citric acid core where the three hydroxyl groups are esterified with three butyl chains. The butyl chains are represented as H₃C-CH₂-CH₂-CH₂-C(=O)-O- attached to the citric acid backbone. The central carbon of the citric acid core is bonded to a methyl group (H₃C) and three oxygen atoms, each of which is part of an ester linkage to a butyl chain.</p>
