Chemical Properties

CAS	
Formula	C10H18O2
MW	170.25
Storage	
Structure	 <p>The image shows the chemical structure of cyclohexanebutyric acid. It consists of a cyclohexane ring (a six-membered carbon ring) attached to a four-carbon chain. The first carbon of this chain is part of a carboxylic acid group, with a hydroxyl group (HO) and a carbonyl group (C=O) attached to it.</p>
