Chemical Properties

CAS	
Formula	C ₁₀ H ₁₇ NO
MW	167.25
Storage	
Structure	 <p>The chemical structure of Citral oxime is shown as a skeletal structure. It consists of a 3-methylbut-2-enal chain where the aldehyde group has been converted to an oxime group (-N-OH). The structure is labeled with 'H₃C' and 'CH₃' at the methyl groups, and 'N-OH' at the oxime group.</p>
