Chemical Properties

CAS	
Formula	C ₂₄ H ₃₈ O ₄
MW	390.57
Storage	
Structure	 <p>The image shows the chemical structure of Di-n-octyl phthalate. It consists of a central phthalate ring system (a benzene ring fused to a six-membered ring with two oxygen atoms) where the two oxygen atoms are each bonded to an n-octyl chain. The n-octyl chains are represented as zigzag lines with terminal H and CH₃ groups.</p>
