Chemical Properties

CAS	
Formula	C ₄ H ₉ N ₃ O ₂
MW	131.14
Storage	
Structure	 <p>The chemical structure of Creatine is shown as a skeletal structure. It consists of a central carbon atom bonded to a hydroxyl group (HO) and a carbonyl group (C=O). This carbon is also bonded to a nitrogen atom (N) which is further bonded to a methyl group (CH₃) and a guanidino group (-NH-C(=NH)-NH₂).</p>
