## Chemical Properties

CAS	
Formula	C <sub>12</sub> H <sub>27</sub> N
MW	185.36
Storage	
Structure	 <p>The image shows the chemical structure of Tributylamine, which consists of a central nitrogen atom bonded to three propyl chains. Each propyl chain is represented by a zigzag line with a methyl group (CH<sub>3</sub>) at the end. The structure is drawn in a perspective view, with one propyl chain extending upwards and to the left, another extending upwards and to the right, and the third extending downwards.</p>
