order@dcchemicals.com

Chemical Properties

CAS	
Formula	C15H14O3
MW	242.27
Storage	
Structure	 <p>The image shows the chemical structure of Benzylmandelate, which consists of a benzene ring attached to a methylene group (-CH2-), which is further attached to an ester group (-COO-). The ester group is linked to a chiral center (a carbon atom) that is also bonded to a hydroxyl group (-OH) and another benzene ring.</p>
