Chemical Properties

CAS	
Formula	C10H10CLNO2
MW	211.65
Storage	
Structure	 <p>The chemical structure shows a butanedial chain (H-C(=O)-CH2-CH2-C(=O)-H) where the terminal aldehyde hydrogen is replaced by a hydrogen atom, and the other terminal aldehyde hydrogen is replaced by a hydrogen atom. The second carbon of the chain is bonded to a hydrogen atom and a nitrogen atom, which is in turn bonded to a 4-chlorophenyl ring.</p>
