Chemical Properties

CAS	
Formula	C ₃₅ H ₆₁ NO ₁₂
MW	687.87
Storage	
Structure	 <p>The image shows the chemical structure of Oleandomycin, a 14-membered macrolide antibiotic. It features a large ring with multiple hydroxyl groups, methyl groups, and a complex side chain including a dimethylamino group and a methyl group. The structure is labeled with 'C' and 'H' atoms and includes a 'Clind' label pointing to a specific part of the side chain.</p>
