|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CAS | |
| Formula | C ₉ H ₈ N ₈ O ₂ S |
| MW | 292.28 |
| Storage | |
| Structure |  <p>The chemical structure of Thiamiprine is a complex heterocyclic molecule. It features a central pyrimidine ring system fused to a thiazole ring. A thiazolidine ring is attached to the pyrimidine ring, and a thiazole ring is attached to the thiazolidine ring. The thiazole ring has a methyl group and a nitro group (N⁺=O, O⁻) attached to it. The pyrimidine ring has an amino group (H₂N) attached to it.</p> |
