Chemical Properties

CAS	
Formula	C17H16N2O3
MW	296.33
Storage	
Structure	 <p>The chemical structure shows a central benzene ring with a hydroxyethylamino group (-NHCH2CH2OH) at the 4-position and a methylamino group (-NHCH3) at the 2-position. This central ring is fused to a benzimidazole ring system, which has a benzene ring fused to its 2-position. The benzimidazole ring has two carbonyl groups (=O) at the 1 and 3 positions.</p>
