Chemical Properties

CAS	
Formula	
MW	
Storage	
Structure	 <p>The image shows the chemical structure of Anecortave, a complex steroid molecule. It features a multi-ring steroid nucleus with various functional groups, including a hydroxyl group (H-O) and a chlorine atom (Cl) on the left side, and a chlorine atom (Cl) on the right side. The structure is labeled with 'Cl' and 'H-O' at various positions.</p>
