Chemical Properties

CAS	
Formula	C ₂₂ H ₅₁ CL ₃ N ₃ O ₆
MW	
Storage	
Structure	 <p>The image shows the chemical structure of Polidronium chloride, a polymeric cationic surfactant. It features a central polyethylene glycol (PEG) chain with three quaternary ammonium groups attached. Each ammonium group is paired with a chloride counterion. The structure is shown in a semi-condensed representation with some atoms explicitly labeled (H, O, N, Cl).</p>
