Chemical Properties

CAS	
Formula	C ₁₆ H ₁₇ N ₅ O ₆ S ₂
MW	439.46
Storage	
Structure	 <p>The image shows the chemical structure of Althiomycin, a complex heterocyclic molecule. It features a central pyridine ring substituted with a methyl group, a hydroxyl group, and a side chain containing a thiazolidine ring, a carbonyl group, and a terminal diazole ring. The structure is labeled with 'H = C⁺' and 'Chiral'.</p>
