Chemical Properties

CAS	
Formula	C ₂₉ H ₃₀ O ₁₄ .
MW	602.545
Storage	
Structure	 <p>The image shows the chemical structure of Amarogentin, a complex polyphenolic compound. It features a central chromane-like core with multiple hydroxyl groups and a side chain containing a phenyl ring with a hydroxyl group. The structure is labeled with 'OH' and 'CH₂OH' groups.</p>
