Structure	 <p>The image shows the chemical structure of Triamcinolone diacetate. It is a corticosteroid with a complex polycyclic ring system. The structure includes a diene system in the A-ring, a ketone group at C-3, a hydroxyl group at C-11, a fluorine atom at C-13, and a diene system in the D-ring. Two acetate groups are attached to the C-20 and C-21 positions of the side chain. The structure is labeled with 'CH₃' and 'O' atoms and has a 'Chem' label above it.</p>
