Chemical Properties

CAS	
Formula	C ₁₉ H ₂₆ CL ₂ N ₆ O ₅ S ₂
MW	553.47
Storage	
Structure	 <p>The image shows the chemical structure of Axepim, a complex organic molecule. It features a central pyridine ring substituted with a methyl group, a propyl group, and a 2-(2,2,2-trifluoroethyl)ethyl group. This central ring is further substituted with a 2-(2,2,2-trifluoroethyl)ethyl group and a 2-(2,2,2-trifluoroethyl)ethyl group. The structure is highly branched and contains multiple functional groups, including amide and sulfonamide groups.</p>
