

## Certificate of Analysis

Target	Products>>Novel inhibitors
Cat.No	DC37688
Name	D-Malic acid

**Tel:** +86-21-58447131

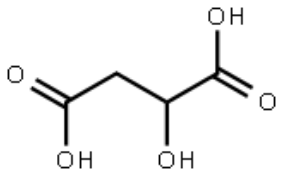

**Fax:** +86-21-61642470

**Email:**

## Chemical Properties

CAS	
Formula	C <sub>4</sub> H <sub>6</sub> O <sub>5</sub>
MW	134.08
Storage	
Structure	 <p>The image shows the chemical structure of D-malic acid, which is a four-carbon dicarboxylic acid with two hydroxyl groups. The structure is drawn in a skeletal format with explicit hydrogen and oxygen atoms. The carboxyl groups are at the ends of the chain, and the hydroxyl groups are on the second and third carbons. The stereochemistry is D, meaning the hydroxyl group on the third carbon is on the right side of the Fischer projection.</p>
Purity
