Chemical Properties

CAS	
Formula	C7H14N2O4S
MW	222.25
Storage	
Structure	 <p>The image shows the chemical structure of L-Cystathionine. It consists of a central sulfur atom bonded to two ethyl chains. Each ethyl chain is substituted with an amino group (-NH₂) and a carboxylic acid group (-COOH). The amino group on the right chain is labeled as 'Chiral'.</p>
