Chemical Properties

CAS	
Formula	C ₉ H ₁₃ NO ₂
MW	167.2
Storage	
Structure	 <p>The image shows the chemical structure of Phenylephrine. It consists of a benzene ring with a hydroxyl group (-OH) at the 3-position. A 1-phenylethylamino group is attached to the 1-position of the ring. The ethyl chain is shown with a chiral center at the carbon bearing the hydroxyl group, which is indicated by a dashed bond to the OH group. The label 'Chiral' is placed above the structure. The methyl group is labeled 'H₃C'.</p>
