Chemical Properties

CAS	
Formula	C ₁₄ H ₁₂ N ₄
MW	236.27
Storage	
Structure	 <p>The chemical structure shows a central benzimidazole ring system. One of the benzimidazole nitrogens is bonded to a hydrogen atom (NH). The 2-position of the benzimidazole ring is substituted with a phenyl ring. The 5-position of the benzimidazole ring is substituted with a 4-methylphenyl ring, where the methyl group is explicitly labeled as 'H-C'.</p>
Purity
