## Chemical Properties

CAS	
Formula	C <sub>5</sub> H <sub>7</sub> NO <sub>2</sub>
MW	113.11
Storage	
Structure	 <p>The chemical structure shows L-Propargylglycine. It consists of a propargyl group (HC≡C-CH<sub>2</sub>-) attached to a chiral carbon atom. This chiral carbon is also bonded to an amino group (H<sub>2</sub>N) and a carboxylic acid group (-COOH). The carboxylic acid group is shown with a carbonyl oxygen (O) and a hydroxyl group (OH). The word 'Chiral' is written above the central carbon atom.</p>
