Chemical Properties

CAS	
Formula	C ₂₁ H ₃₆ N ₈ O ₇
MW	512.56
Storage	
Structure	 <p>The chemical structure of Elastatinal is a complex molecule featuring a central chain of amide bonds. It includes a pyrazole ring system on the left, a carboxylic acid group at the top left, and a terminal aldehyde group on the right. The structure is highly branched with multiple nitrogen and oxygen atoms.</p>
