Chemical Properties

CAS	
Formula	C ₂₅ H ₃₀ FNO ₆
MW	459.51
Storage	
Structure	 <p>The image shows the chemical structure of Fluazacort, a corticosteroid. It features a complex polycyclic steroid nucleus with a fluorine atom at C-21, a methyl group at C-13, and a side chain at C-17 containing a methyl group, a double bond, and a carboxylic acid group. The A-ring has a ketone at C-3, and the D-ring has a ketone at C-20. The E-ring is a phenyl ring with a ketone at C-3.</p>
