Chemical Properties

| | |
|-----------|---|
| CAS | |
| Formula | C ₉ H ₁₈ N ₂ O ₃ |
| MW | 202.25 |
| Storage | |
| Structure |  <p>The chemical structure shows Leucyl-alanine, a dipeptide. It consists of an alanine residue (left) and a leucine residue (right) linked by a peptide bond. The alanine part has a carboxyl group (COOH) and a methyl group (CH₃). The leucine part has an amino group (NH₂) and an isobutyl side chain (CH₂-CH(CH₃)-CH₃). The label 'Chiral' is placed above the leucine side chain.</p> |
