Chemical Properties

CAS	
Formula	C ₁₅ H ₂₉ NO ₃
MW	271.4
Storage	
Structure	 <p>The image shows the chemical structure of Lauroyl alanine. It consists of a long hydrocarbon chain (lauroyl group) attached to an alanine moiety. The alanine part is shown in a Fischer-like projection with a central carbon atom bonded to a hydrogen atom (H) on the left, a hydrogen atom (H) on the right, a hydroxyl group (OH) on top, and a carboxyl group (COOH) on the bottom. The lauroyl chain is represented as a zigzag line extending to the left from the central carbon.</p>
