Chemical Properties

CAS	84-17-3
Formula	C ₁₈ H ₁₈ O ₂
MW	266.33
Storage	
Structure	 <p>The chemical structure of Dienestrol is shown. It consists of two phenyl rings connected by a central carbon-carbon double bond. The left phenyl ring has a hydroxyl group (-OH) at the para position. The right phenyl ring has a hydroxyl group (-OH) at the para position. The central double bond is substituted with two methyl groups (-CH₃), one on each carbon of the double bond.</p>
