Chemical Properties

CAS	
Formula	C17H18N2O5S
MW	362.4
Storage	
Structure	 <p>The chemical structure of Piretanide is shown. It features a central benzene ring with a carboxylic acid group (-COOH) at the 4-position, a pyrrolidine ring attached to the 1-position, a sulfonamide group (-SO₂NH₂) at the 2-position, and a phenoxy group (-O-C₆H₅) at the 3-position.</p>
