Chemical Properties

CAS	6923-22-4
Formula	C ₇ H ₁₄ NO ₅ P
MW	223.16
Storage	
Structure	 <p>The chemical structure of Monocrotophos is shown. It consists of a central phosphorus atom (P) bonded to a methyl group (CH₃), a methoxy group (OCH₃), and a methoxy group (OCH₃). The phosphorus atom is also bonded to an oxygen atom that is part of a phosphate group. This phosphate group is further bonded to a methylene group (CH₂), which is in turn bonded to a carbon atom. This carbon atom is part of a double bond with another carbon atom, which is bonded to a methyl group (CH₃). The double bond is also bonded to a carbonyl group (C=O), which is bonded to a methylene group (CH₂).</p>
