Chemical Properties

CAS	
Formula	C ₁₀ H ₁₄ N ₅ Na ₂ O ₁₂ P ₃
MW	535.15
Storage	
Structure	 <p>The image shows the chemical structure of Guar gum sodium salt. It consists of a central pyrimidine ring system substituted with a methyl group and a hydroxyl group. This is linked to a ribose sugar ring, which is further substituted with a phosphate group. The phosphate group is part of a complex sodium salt structure, including a sodium ion (Na+) and a phosphate group coordinated to several water molecules and another sodium ion (Na+).</p>
