Chemical Properties

| | |
|-----------|---|
| CAS | |
| Formula | C ₁₂ H ₂₆ O ₂ |
| MW | 202.338 |
| Storage | |
| Structure |  <p>The image shows the chemical structure of Decanal dimethyl acetal. It consists of a ten-carbon decyl chain (CH₃(CH₂)₉) attached to a central carbon atom. This central carbon is also bonded to two oxygen atoms, each of which is further bonded to a methyl group (CH₃), forming a dimethyl acetal group.</p> |
