## Chemical Properties

CAS	
Formula	C <sub>13</sub> H <sub>26</sub> O <sub>2</sub>
MW	214.35
Storage	
Structure	 <p>The image shows the chemical structure of Isopropyl caprate, which is an ester. It consists of a long hydrocarbon chain (caproic acid part) attached to an isopropyl group via an ester linkage. The structure is drawn in a skeletal format with labels for the terminal methyl groups (H3C).</p>
