Chemical Properties

CAS	
Formula	C ₁₁ H ₂₂ O ₂
MW	186.29
Storage	
Structure	 <p>The image shows the skeletal structure of methyl decanoate, a long-chain ester. It consists of a ten-carbon alkyl chain (decanoate) attached to a methyl group (methyl) via an ester linkage. The structure is drawn in a zig-zag conformation with the ester group at the right end.</p>
