Chemical Properties

CAS	
Formula	C ₁₁ H ₂₀ O ₄
MW	216.28
Storage	
Structure	 <p>The image shows the chemical structure of Monomethyl sebacate, which is a long-chain fatty acid ester. It consists of a 10-carbon aliphatic chain with a carboxylic acid group at one end and a methyl ester group at the other. The structure is drawn in a skeletal format with explicit oxygen and hydrogen atoms.</p>
Purity
