Chemical Properties

CAS	
Formula	C15H30O2
MW	242.4
Storage	
Structure	 <p>The image shows the skeletal structure of pentyl decanoate, a long-chain ester. It consists of a decanoate group (10 carbons) esterified with a pentyl group (5 carbons). The structure is shown as a zigzag line with an oxygen atom and a carbonyl group (C=O) connecting the two chains. The labels 'H-C' and 'C-H' are placed at the ends of the chains to indicate the terminal groups.</p>
