Chemical Properties

| | |
|-----------|---|
| CAS | |
| Formula | C ₁₀ H ₁₉ ClO |
| MW | 190.71 |
| Storage | |
| Structure |  <p>The image shows the skeletal structure of decanoyl chloride, a long-chain fatty acid derivative. It consists of a ten-carbon chain with a chlorine atom attached to the first carbon and a carbonyl group at the other end. The SMILES string is <chem>CCCCCCCCCCCC(=O)Cl</chem>.</p> |
