## Chemical Properties

CAS	
Formula	C <sub>10</sub> H <sub>16</sub> O <sub>2</sub>
MW	168.24
Storage	
Structure	 <p>The chemical structure of Decaprenoic acid is shown as a skeletal structure. It consists of a decaprenyl chain with a terminal carboxylic acid group. The chain has two double bonds, each with a methyl group attached. The methyl groups are labeled 'H<sub>3</sub>C' and 'C H<sub>3</sub>'. The carboxylic acid group is labeled 'HO' and 'O'.</p>
