Chemical Properties

| | |
|-----------|--|
| CAS | |
| Formula | C ₁₆ H ₃₃ NO ₂ |
| MW | 271.44 |
| Storage | |
| Structure |  <p>The chemical structure of Delmopinol is shown. It features a piperidine ring with an oxygen atom at the top position. A methyl group (CH₃) is attached to the nitrogen atom. A propyl chain is attached to the carbon atom adjacent to the nitrogen, with a methyl group (CH₃) at the end. A hydroxyl group (OH) is attached to the carbon atom at the bottom position of the piperidine ring. The label 'CH₃OH' is placed near the hydroxyl group.</p> |
