Chemical Properties

CAS	
Formula	C ₁₉ H ₂₀ O ₅
MW	328.36
Storage	
Structure	 <p>The image shows the chemical structure of Decursinol angelate. It consists of a decursinol moiety (a bicyclic system with a decursin core and a decursinol side chain) esterified with angelic acid. The decursinol part has a methyl group (CH₃) and a hydroxyl group (OH) on the decursin ring, and a decursinol side chain with a methyl group (CH₃) and a hydroxyl group (OH). The angelic acid part is a five-membered ring with two methyl groups (CH₃) and a carbonyl group (C=O).</p>
