

## Certificate of Analysis

Target	Products>>Novel inhibitors
Cat.No	DC36729
Name	Decyl acetate

**Tel:** +86-21-58447131

**Fax:** +86-21-61642470

**Email:**

## Chemical Properties

CAS	
Formula	C <sub>12</sub> H <sub>24</sub> O <sub>2</sub>
MW	200.32
Storage	
Structure	 <p>The image shows the chemical structure of decyl acetate, which consists of a ten-carbon decyl chain attached to an acetate group. The decyl chain is represented by a zigzag line starting with a methyl group (H<sub>3</sub>C) on the left and ending with a methylene group (-CH<sub>2</sub>) on the right. The acetate group is shown as a carbonyl group (C=O) bonded to a methoxy group (-OCH<sub>3</sub>).</p>
