Chemical Properties

CAS	
Formula	C ₂₀ H ₂₃ NO ₃
MW	325.4
Storage	
Structure	 <p>The chemical structure of Benalaxyl is shown. It features a central nitrogen atom bonded to a 2,4-dimethylphenyl ring, a methyl group, and a chiral auxiliary group. The auxiliary group consists of a chiral center bonded to a methyl group, a methoxy group, and a carbonyl group. This carbonyl group is further bonded to a benzyl group. The word 'Chiral' is written above the auxiliary group.</p>
