Chemical Properties

| | |
|-----------|---|
| CAS | |
| Formula | C ₂₂ H ₂₉ ClO ₅ |
| MW | 408.919 |
| Storage | |
| Structure |  <p>The image shows the chemical structure of Beclometasone, a corticosteroid. It features a complex polycyclic steroid nucleus with a chlorine atom at the 17-position, a hydroxyl group at the 21-position, and a 16β-acetate ester group. The structure is labeled with 'Cl' and 'OH' groups and includes stereochemical indicators like 'H' and 'H₃C'.</p> |
