Chemical Properties

CAS	
Formula	C ₂₉ H ₂₄ N ₄ O ₈
MW	556.531
Storage	
Structure	 <p>The chemical structure of Niceritrol is a symmetrical molecule. It features a central carbon atom bonded to two ethyl chains. Each ethyl chain is further substituted with a pyridine-2-carbonyl group. The pyridine rings are oriented in a way that suggests a specific stereochemistry, likely a meso form.</p>
