Chemical Properties

CAS	
Formula	C ₁₃ H ₁₆ O ₇
MW	284.264
Storage	
Structure	<p>Chiral</p>  <p>The chemical structure of Helecin is a complex molecule featuring a central six-membered ring with two oxygen atoms. It is substituted with a phenyl ring, a hydroxyl group, a hydroxymethyl group, and a hydroxyl group. The structure is labeled as 'Chiral'.</p>
