Chemical Properties

CAS	
Formula	C13H8N4O3
MW	268.23
Storage	
Structure	 <p>The chemical structure of AG-183 is shown. It consists of a central carbon-carbon double bond. The left carbon of the double bond is substituted with a cyano group (-C≡N) and a diazomethyl group (-CH=N₂). The right carbon of the double bond is substituted with a cyano group (-C≡N) and a 3,4,5-trihydroxybenzyl group (-CH₂-C₆H₃(OH)₃).</p>
