Structure	 <p>The image shows the chemical structure of Valifenalate. It consists of a central benzene ring with a chlorine atom at the para position. Attached to the ring is a side chain containing a carbonyl group, a secondary amine, and a quaternary carbon atom bonded to two methyl groups and another carbonyl group. This second carbonyl group is part of a chain that includes a secondary amine and another carbonyl group, which is in turn bonded to a quaternary carbon atom with two methyl groups. The structure is labeled 'Clinal' at the top right.</p>
