Chemical Properties

CAS	2074702-04-6
Formula	C ₂₅ H ₂₁ ClF ₂ N ₆ O
MW	494.92
Storage	
Structure	 <p>The chemical structure shows a complex heterocyclic system. It features a central pyridine ring substituted with a methyl group, a chlorine atom, and a 4-cyano-2-fluorophenyl group. This pyridine ring is linked via a methylene bridge to another pyridine ring, which is further substituted with a methyl group and a chlorine atom. A third pyridine ring is attached to the second pyridine ring, bearing a methyl group and a chlorine atom. A fourth pyridine ring is connected to the third, substituted with a methyl group and a chlorine atom. The structure is highly symmetrical and contains multiple nitrogen and oxygen atoms.</p>
Purity	>98%
