Chemical Properties

CAS	1051375-13-3
Formula	C ₁₉ H ₁₇ F ₂ N ₃ NaO ₅ ⁺
MW	428.34
Storage	
Structure	 <p>The image shows the chemical structure of Cabotegravir Sodium. It consists of a central pyridine ring substituted with a hydroxyl group (-OH) and a carbonyl group (-C(=O)-). This pyridine ring is further substituted with a morpholine ring and a 2-(2,4-difluorophenyl)acetamide group (-NH-CH₂-C₆H₃(F)₂). A sodium ion (Na⁺) is shown below the structure, indicating the sodium salt form.</p>
Purity	>98%
