Chemical Properties

CAS	88206-46-6
Formula	C ₂₁ H ₂₂ O ₅
MW	354.4
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The chemical structure of Notopterol consists of a complex polycyclic core. It features a benzene ring fused to a furan ring, which is further fused to a pyridine ring. A side chain is attached to the benzene ring, containing a double bond with a methyl group, a hydroxyl group, and another double bond with two methyl groups.</p>
Purity	>98%, Standard References Grade
