Chemical Properties

CAS	98474-78-3
Formula	C ₃₆ H ₆₂ O ₁₀
MW	654.876
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The image shows the chemical structure of Pseudoginsenoside RT5, a complex saponin. It features a steroid-like aglycone core with multiple hydroxyl groups and a complex sugar moiety attached via an ether linkage. The sugar moiety includes a pyranose ring and a furanose ring, with various hydroxyl and methyl groups. The structure is labeled with 'CH2OH' and 'CH3' groups.</p>
Purity	>98%, Standard References Grade
